

Our new village website is now fully up and the major difference is that the website is fully interactive and people can contribute from their own home with the updating of pages.

If you go to the message board any information about local meetings, GAA training, Mass times etc, can be uploaded from you computer and will appear on the website. A very popular feature with people away from home in the older website was the picture gallery now with our new picture gallery you can upload your own album and share your pictures or keep them private.

New features will be updated to the website in time and suggestions are welcome to help improve the website and make it a community. Just added to the website is an interactive photo gallery where you can upload your pictures for all to see (or have your own private album for family, friends and relatives viewing only) around the world. It's just takes a simple registration and you can upload as many pictures as you want.
